

TRITON

OUR SECTORS

High-value cargo

We frequently work with project shippers who specialize in moving high-value cargo for their clients.

OUR SECTORS – HIGH-VALUE CARGO

Providing equipment specifically designed for high-value cargo

Our range of equipment can provide the perfect solution for moving or shipping high-value cargo, such as yachts, cars, or helicopters.

High-value cargo can require specialist equipment and additional precautions to ensure shipments arrive at their destination safely. At Triton, we lease and sell a wide range of products designed specifically for this purpose.

Yachts and Boats

Triton Roll Trailers allow for minimal handling, reducing the risk of damage. With capacities between 60-120 tons and lengths ranging from 40ft to 62ft, they can accommodate a vast range of vessels.

Alternatively, Triton Flatracks (with flush folding end walls) and Open Tops (with protective tarpaulins) are also designed to move cargo that cannot fit within the constraints of a standard container. They are available in 20ft and 40ft lengths.

Railcars

Triton 62ft Roll Trailers with rails provide an economical solution to facilitate the safe transportation of railcars and ensure they can be loaded and unloaded efficiently.

Cars and vehicles

Vehicles can be shipped using Roll Trailers, Flatracks, and Dry Containers. The best method is dependent on several factors, including the type of vehicle, its size, and its destination. However, 20ft and 40ft Triton Dry Containers are often more cost-effective for transporting cars than other methods and help ensure the car and its contents are kept safe and secure.

Renewable energy equipment

Equipment used within the renewable energy sector is frequently high-value and oversized. In particular, wind turbines are rapidly becoming larger and therefore more challenging to move.

In particular, key components such as nacelles and turbine tower sections often require specialist equipment, such as Roll Trailers, Flatracks, and Dry Containers.

All of our products undergo routine maintenance and inspections to ensure they consistently perform to our high standards. In addition, our leasing agreements are designed to support our customers' operational and financial objectives.

We also sell used products in a variety of conditions, including "As-Is" and "Cargoworthy" export standards.

PLEASE NOTE: The following pages showcase a small sample of products in the Triton global inventory. We stock a wide range of products for lease and sale in various conditions. Get in touch with your local Triton representative for more information.

20ft Flush Folding Flatracks

CLASSIFICATION

Lease

Available via Triton's global network of supply locations.

FEATURES

- Built to carry heavy or oversized cargoes
- Great for specialized shipments of steel, pipes, drums and machinery
- Forklift pockets for easy empty handling
- Heavy duty steel frames and thick plank floors and lashing rings all around
- With flush folding end frames to allow for efficient stacking and repositioning
- Triton's industry leading new production testing and inspection criteria ensures the highest quality container
- Available in the high demand hub ports
- Backed up by Triton's global network of supply locations and dedicated leasing and support teams
- Flexible lease terms to meet your company needs

DIMENSIONS (METRIC/IMPERIAL)

EXTERNAL DIMENSIONS

Length (Base bottom casting)	6,058 mm	19' 10.5"
Width (Base bottom casting)	2,438 mm	8' 0.0"
Height (End frame up)	2,591 mm	8' 6.0"
Height (End frame down)	370 mm	1' 2.6"

INTERNAL DIMENSIONS

Length (Between end panels)	6,038 mm	19' 9.7"
Width (Over bottom side rail)	2,194 mm	7' 2.4"
Height (Side rail to top castings)	2,233 mm	7' 3.9"

CAPACITY & WEIGHTS

Max Gross	34,000 kg	74,960 lbs
Payload	31,200 kg	68,790 lbs
Tare	2,800 kg	6,170 lbs

NOTE: The dimensions of containers correspond to ISO standards.

However, due to production tolerances, a difference in measurement is possible.
